**Re: Magna Metals Site
Response to DEC Letter Dated June 27, 2005
NYSDEC Site No. 36003**

Dear Ms Dewes:

After discussion with ISC Properties, I am writing to inform NYSDEC that Tetra Tech, EC will be preparing a brief Work Plan addendum identifying additional field activities to supplement the existing data. Similarly, as the addendum scope is developed, Tetra Tech, EC will develop a cost proposal of field activities for client approval.

Pursuant to your letter's offer of having NYSDEC and NYSDOH work with us in determining how to proceed with the soil vapor evaluation, I am requesting a meeting on August 31, 2005, 11 AM, at either your Albany Office, or the Site, to discuss soil gas locations.

Also, please be advised that my client point of contact, Mr. Nicholas Ward-Willis is currently on vacation. Similarly, I will away on vacation between August 11 and August 29, 2005.

Given the above schedules and meeting, the work plan addendum will be provided to DEC for comment on September 15, 2005.

If you have any questions, or are able to confirm the meeting to discuss soil vapor, please call me at 973-630-8544.

Regards,

Mark Sielski, PG
